

# TB Drug Supply Challenges – Survey Results

March 18, 2020

Has your program and/or patients in your program's jurisdiction encountered any challenges in accessing or affording any of the following in 2019?

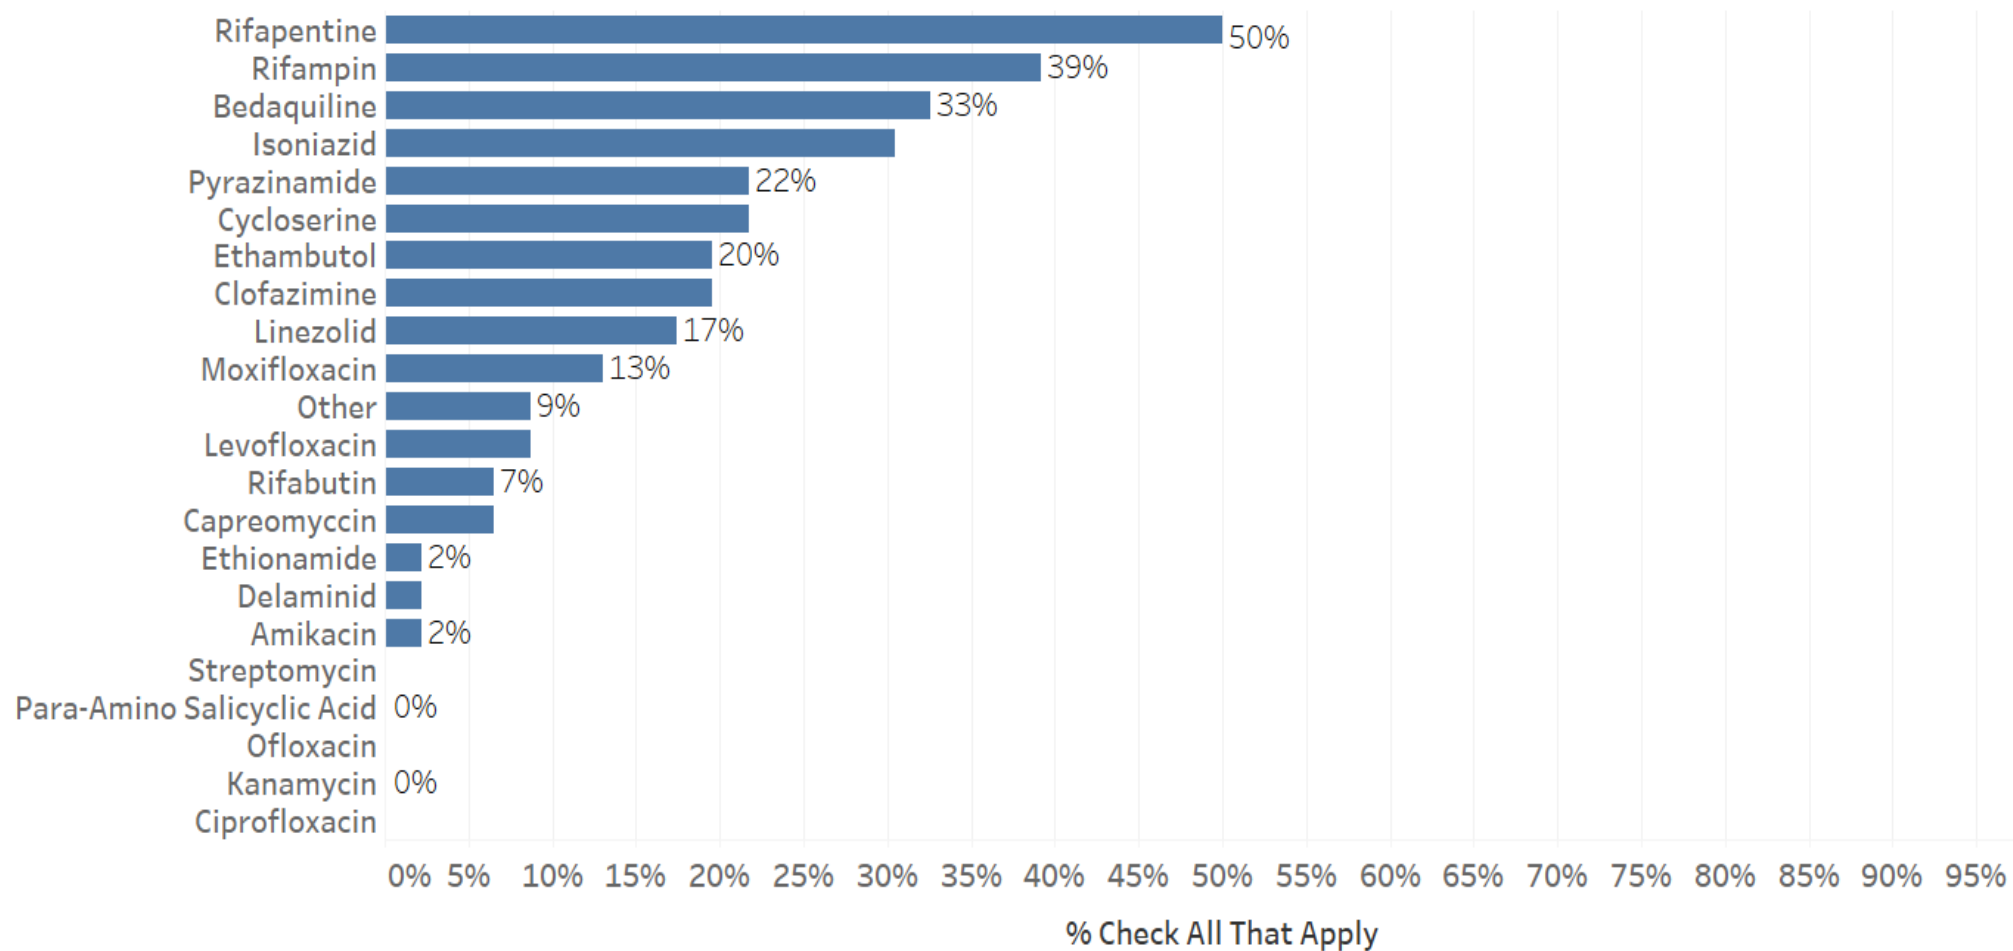

Jurisdiction

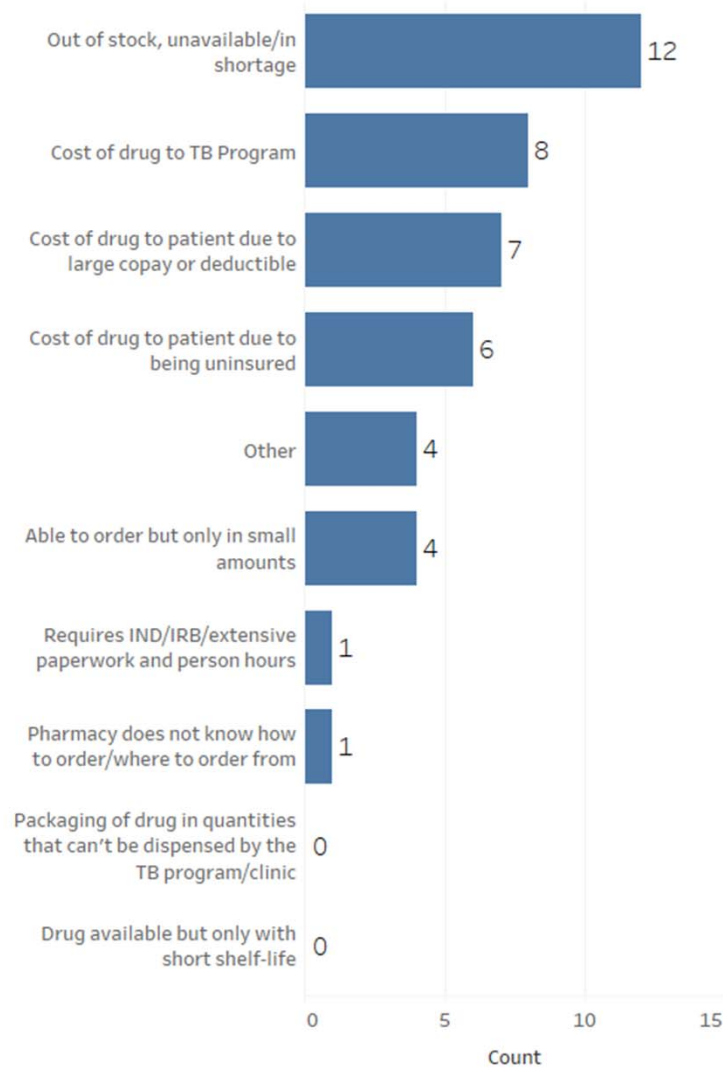

- City TB program
- Other - Please specify (Required)
- Territorial TB program
- County TB program
- State TB program

# In 2019, which TB drugs has your program had trouble accessing and/or affording?

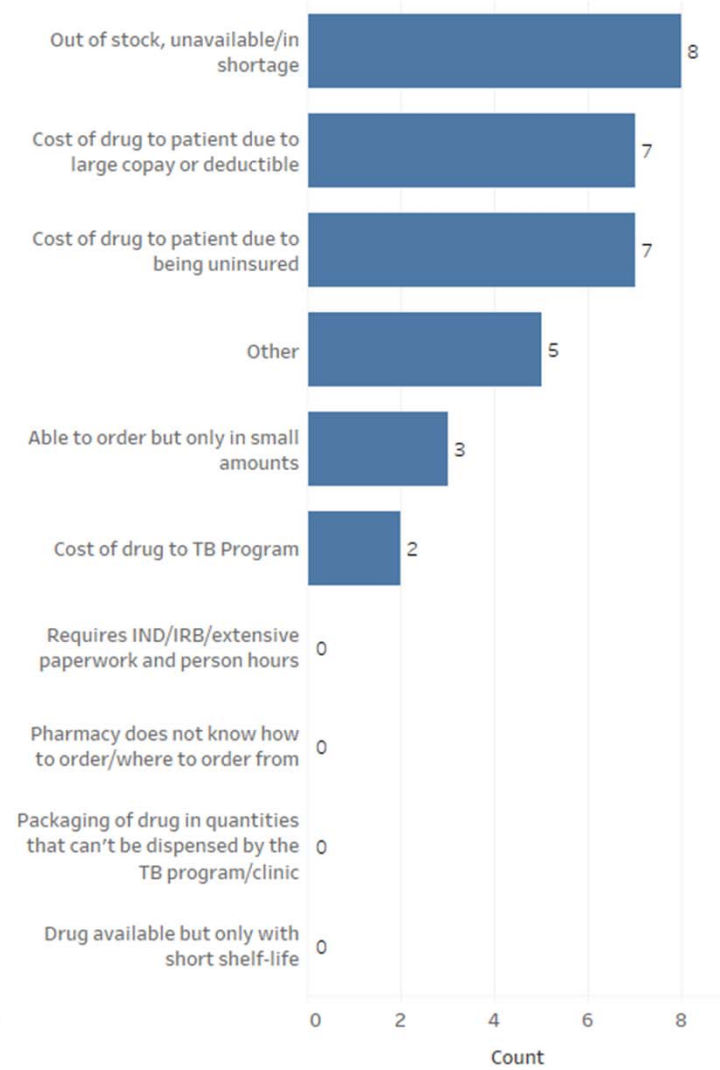

*\*Among those that responded that their jurisdiction faced challenges in accessing/affording TB drugs.*

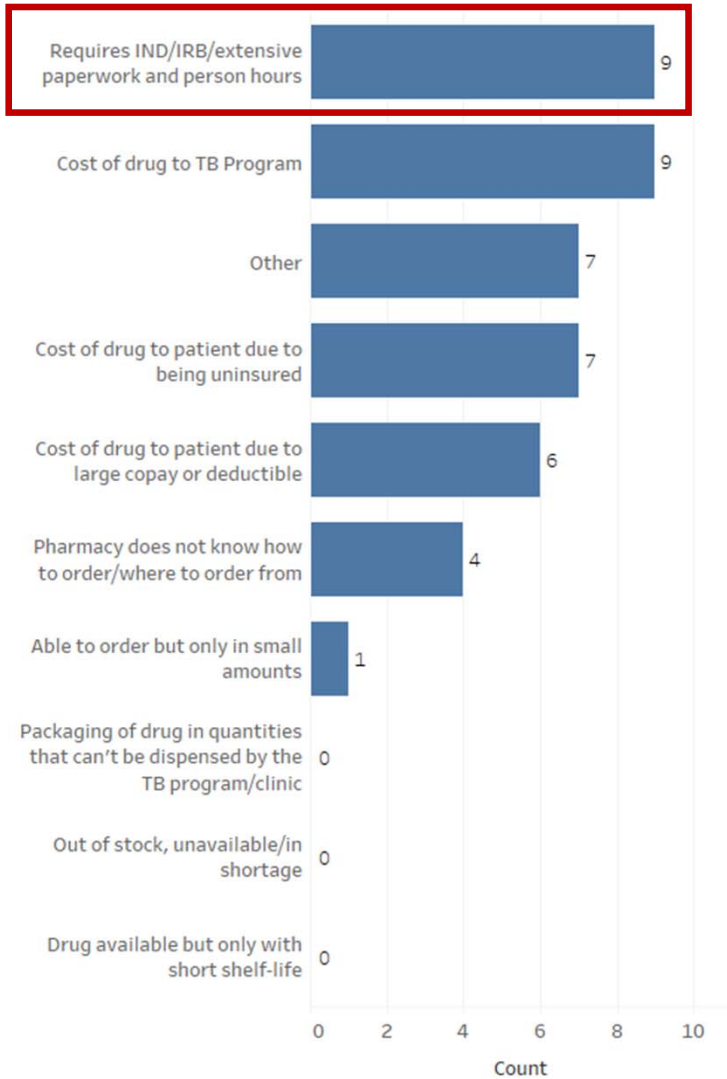

### Problem in Rifapentine Access

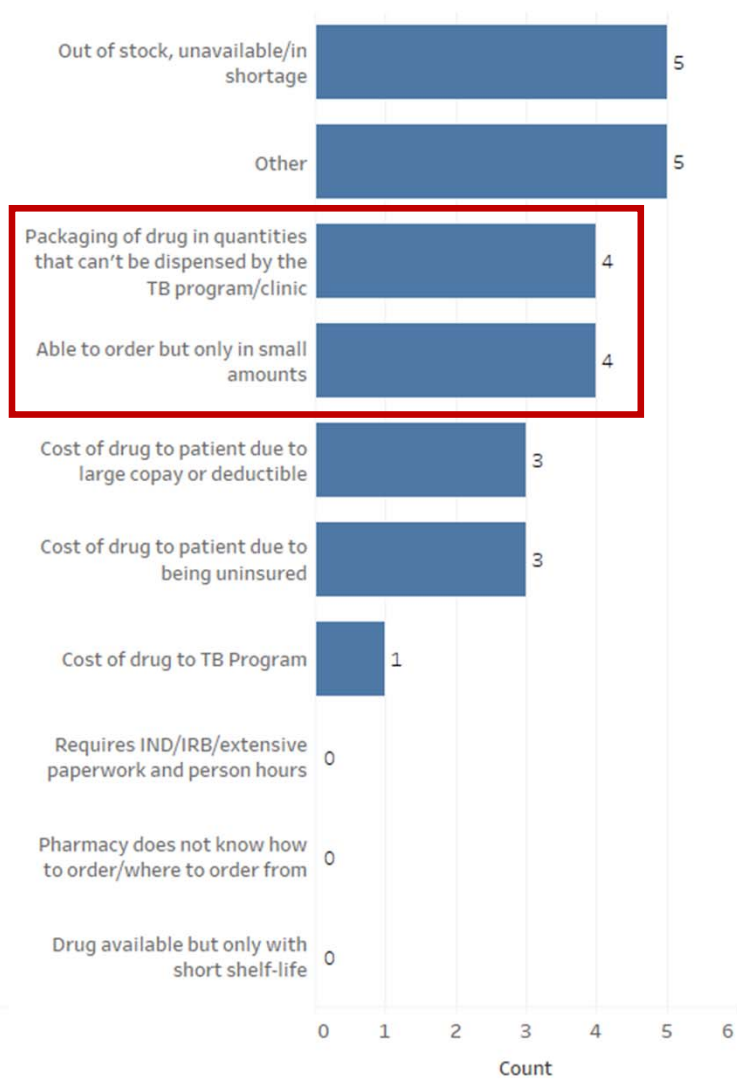

### Problem in Rifampin Access

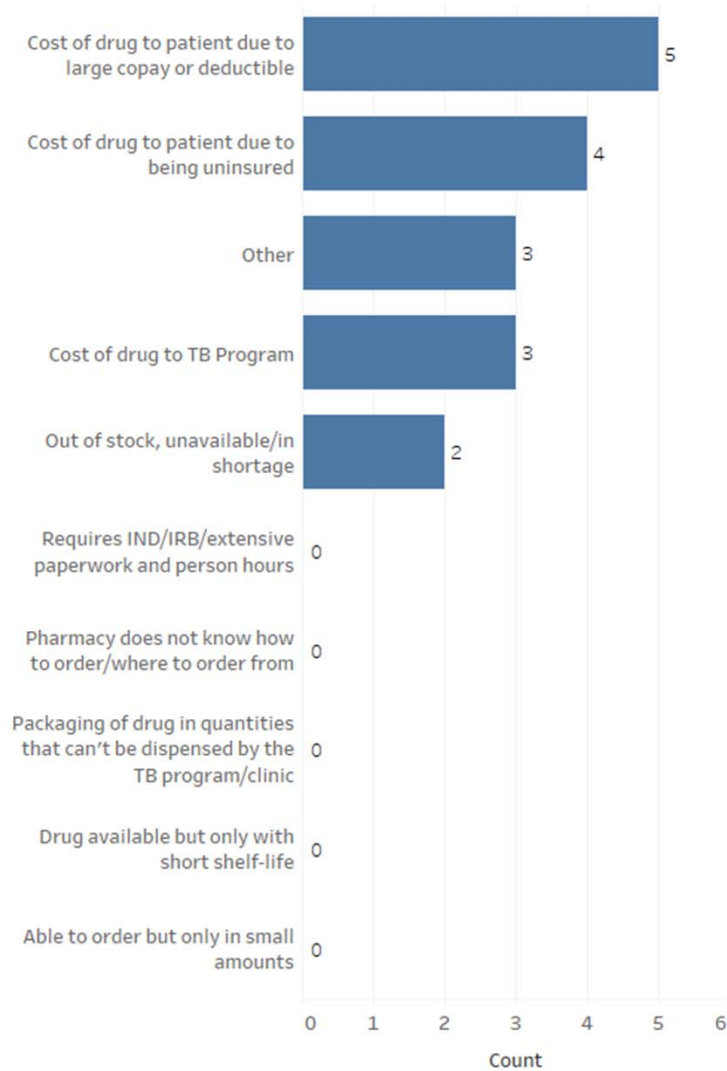

## Problem in Bedaquiline Access

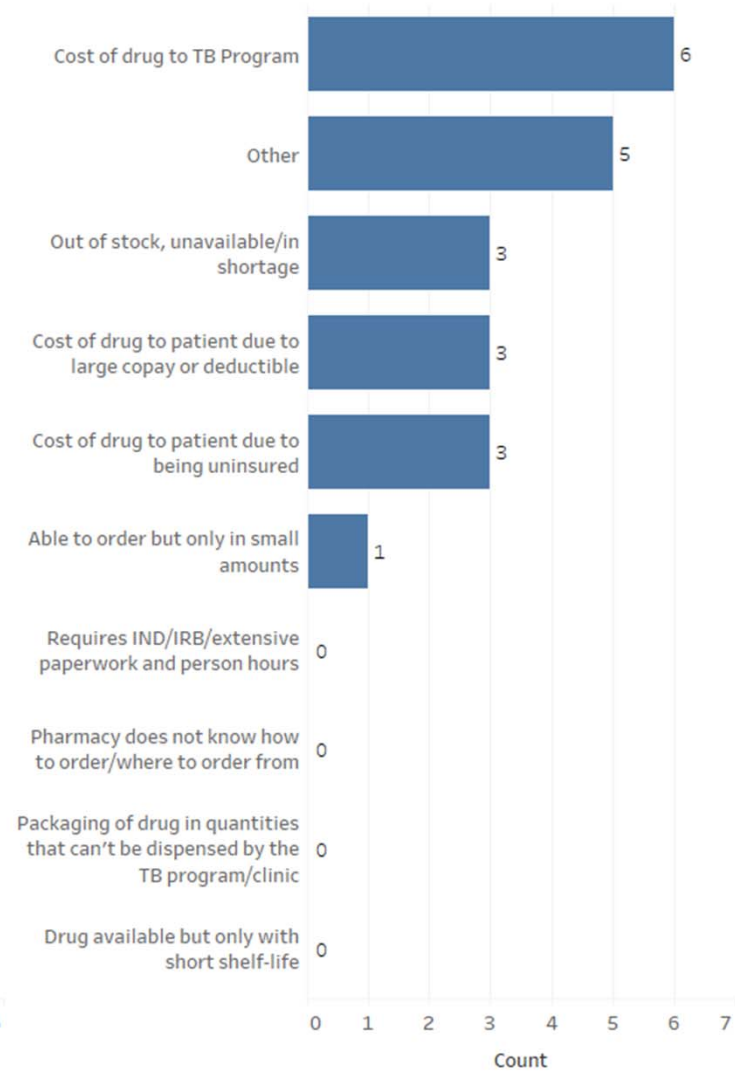

## Problem in Isoniazid Access

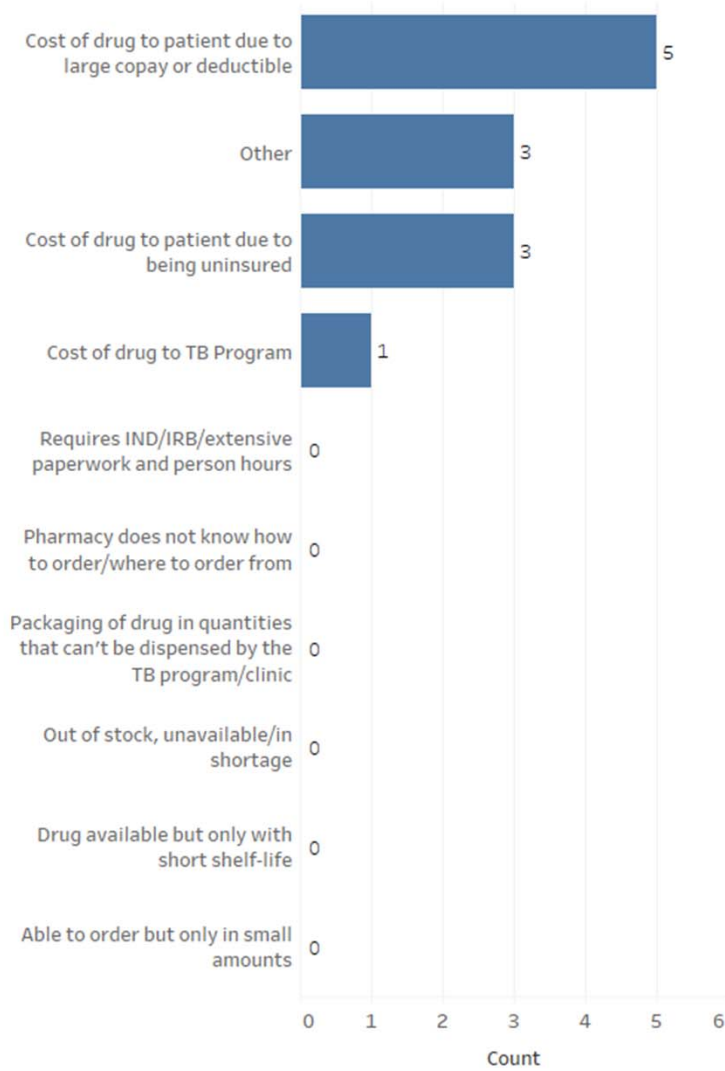

## Problem in Pyrazinamide Access

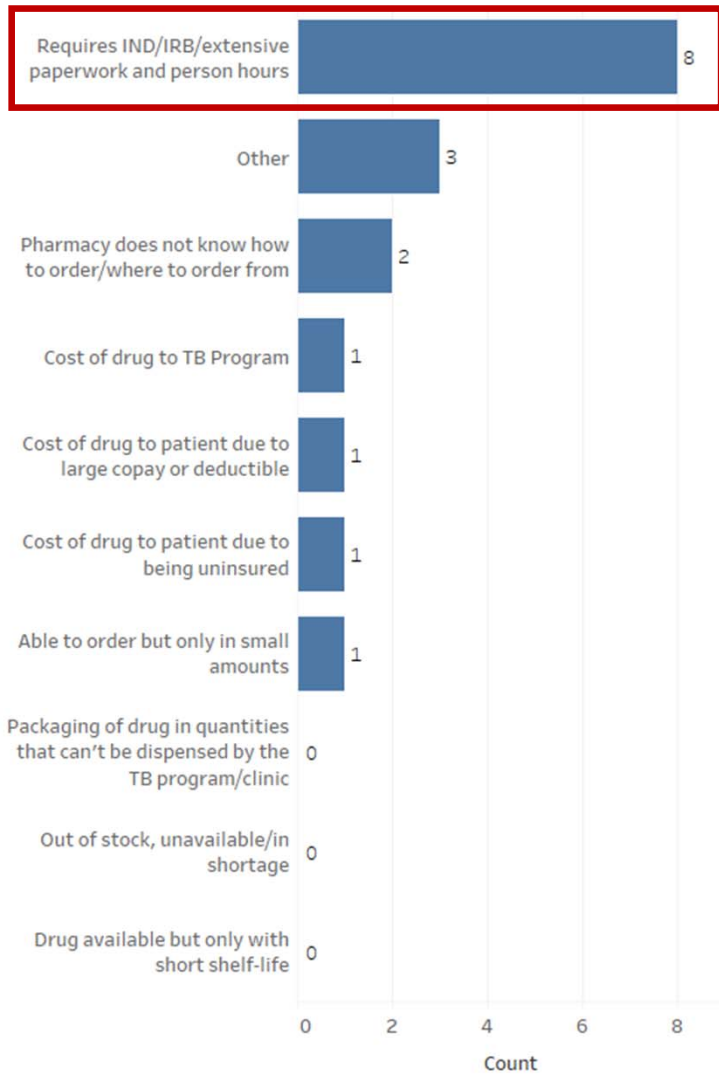

## Problem in Cycloserine Access

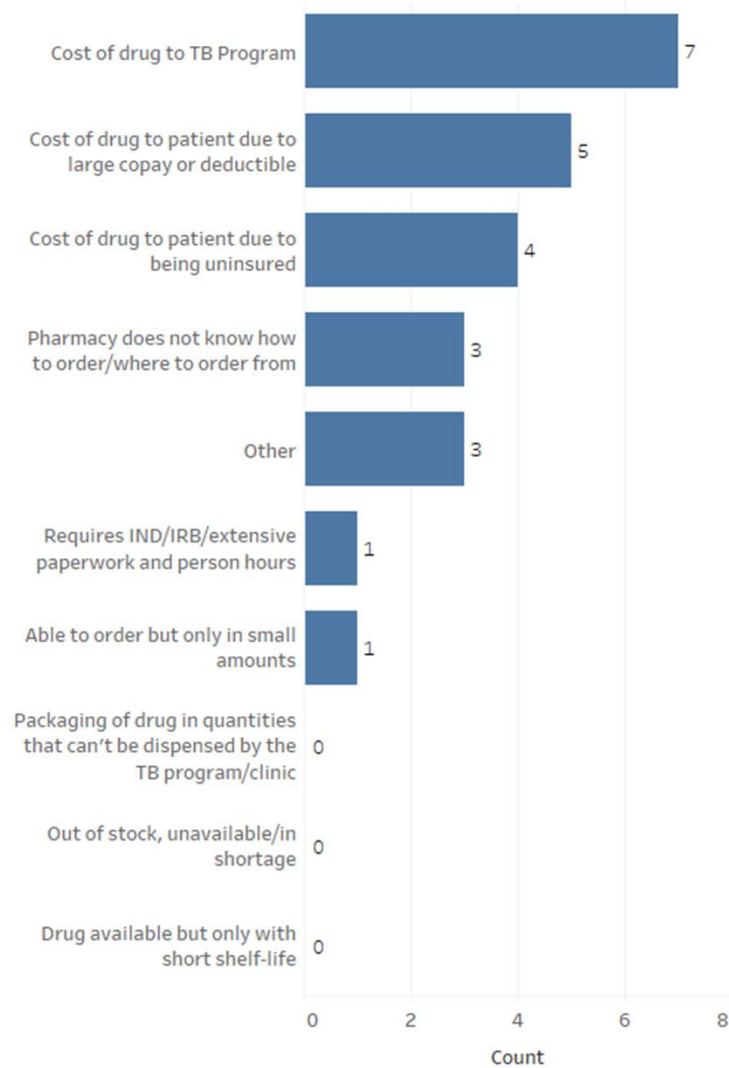

### Problem in Ethambutol Access

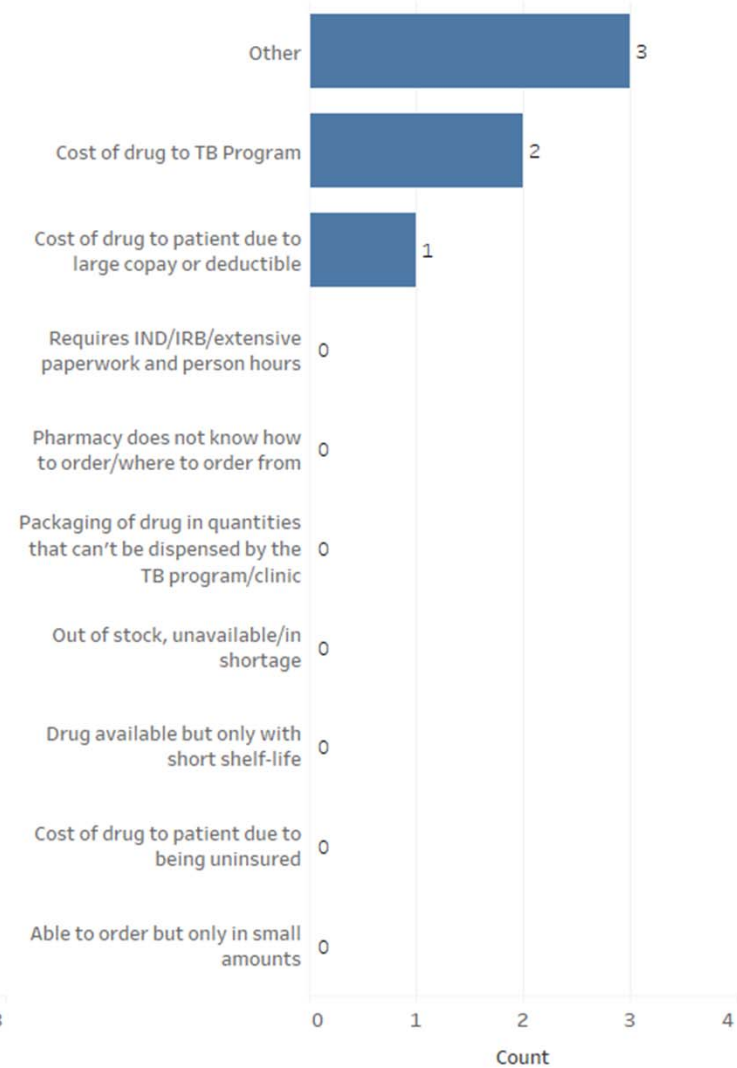

### Problem in Clofazimine Access

## Problem in Linezolid Access

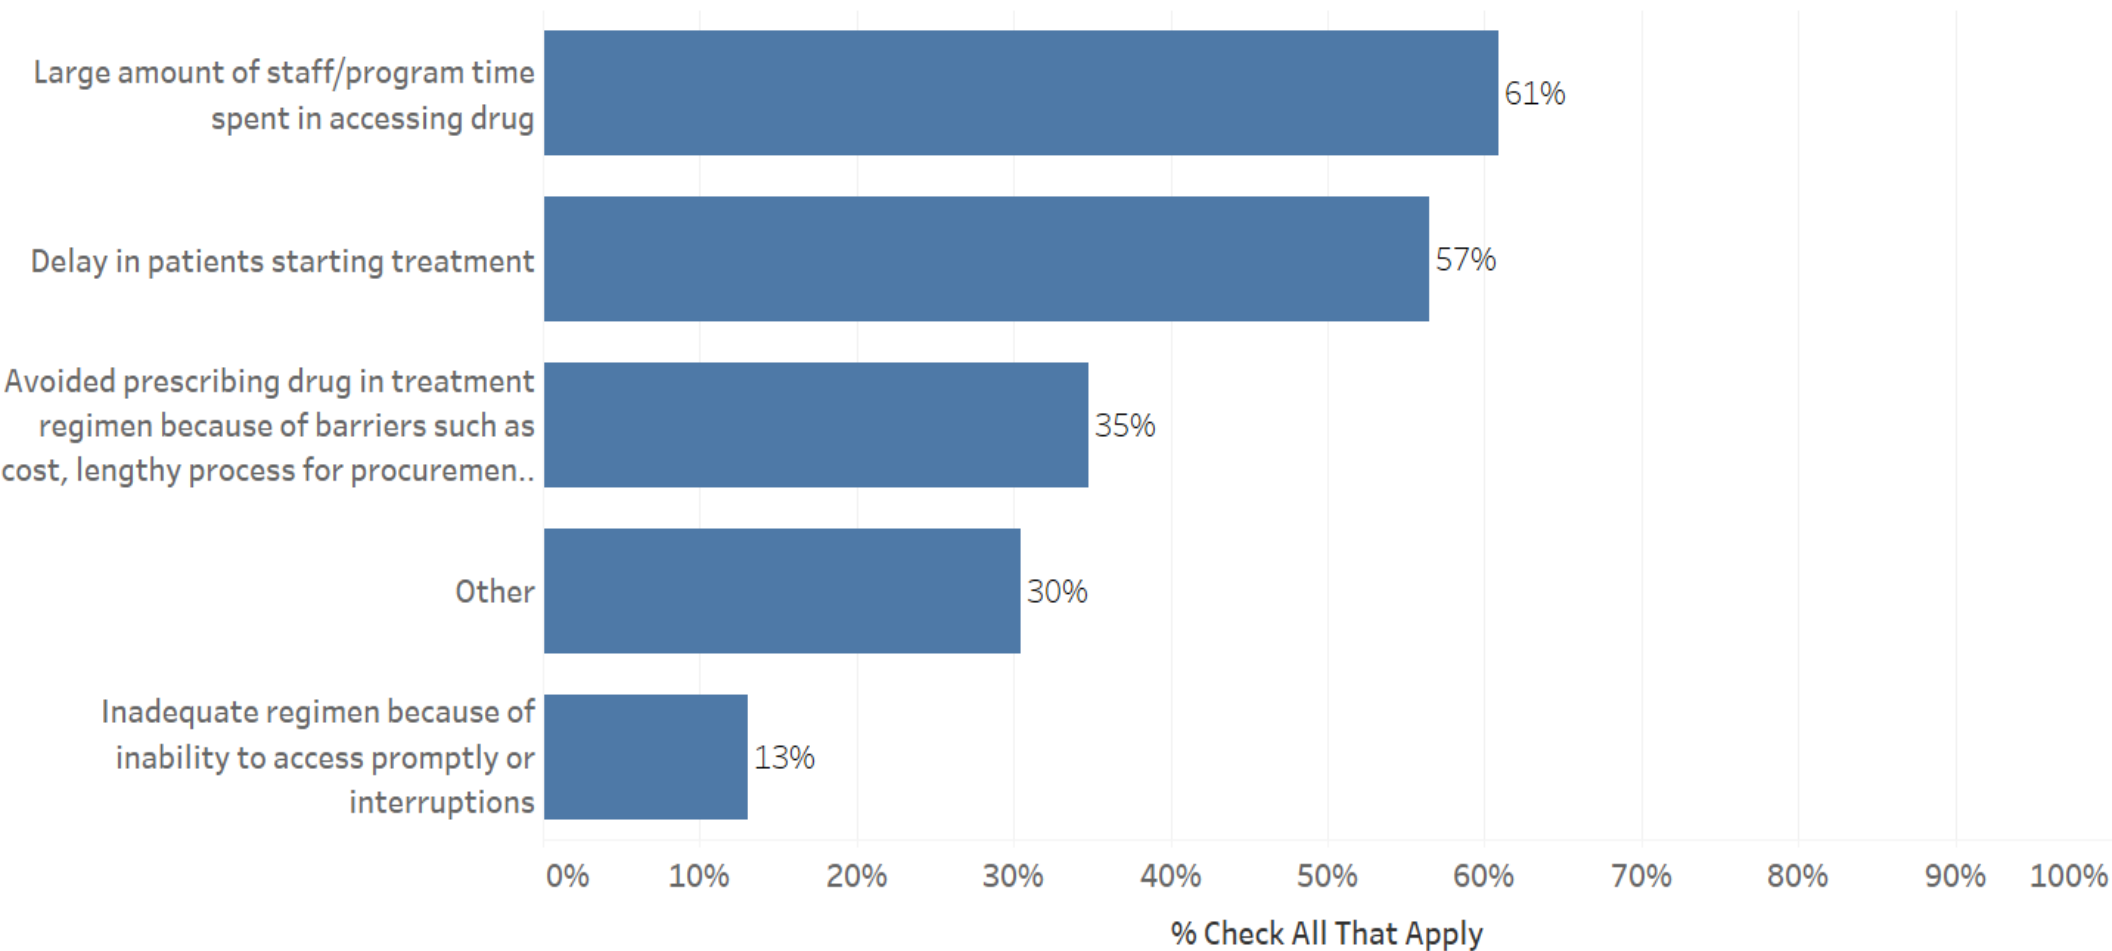

## Problem in Moxifloxacin Access

# How did the challenges you experienced in access or affordability of TB drugs affect your program and/or patients?

*\*Among those that responded that their jurisdiction faced challenges in accessing/affording TB drugs.*

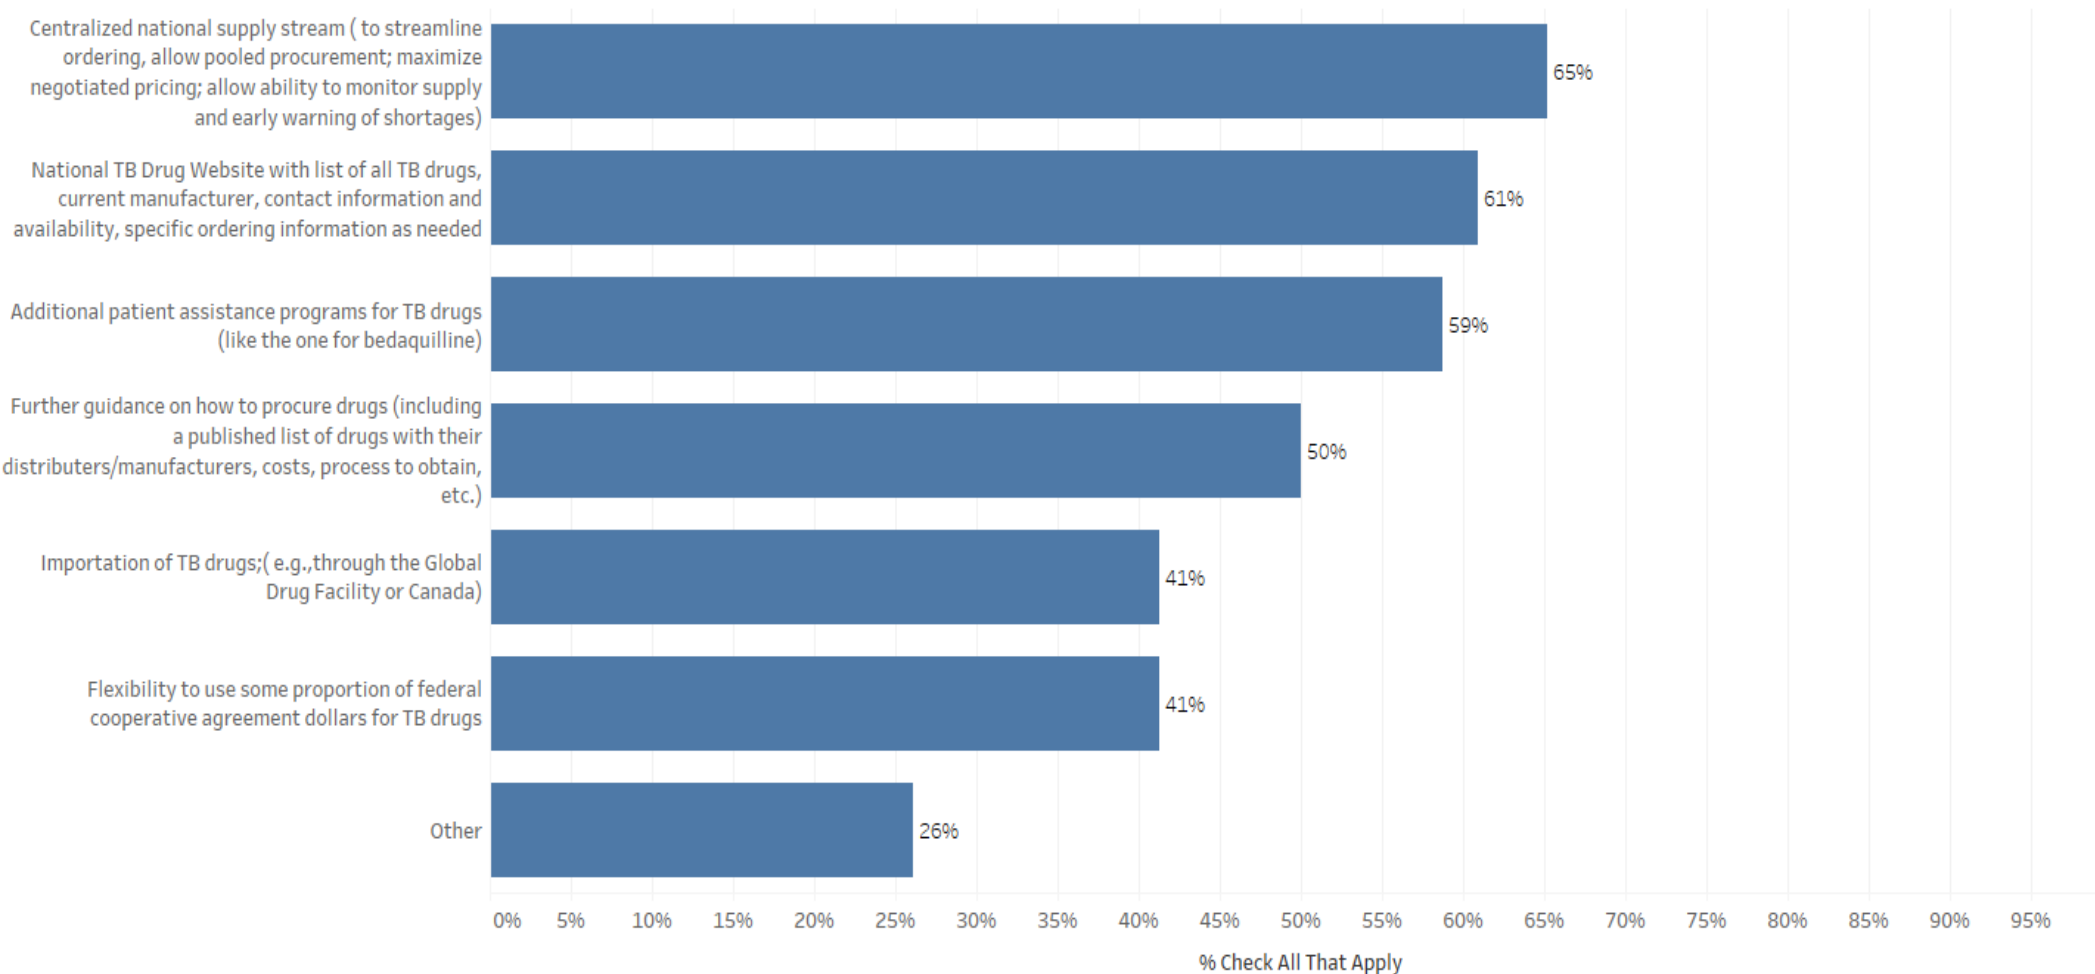

Other – Write in: How did the challenges you experienced in access or affordability of TB drugs affect your program and/or patients?

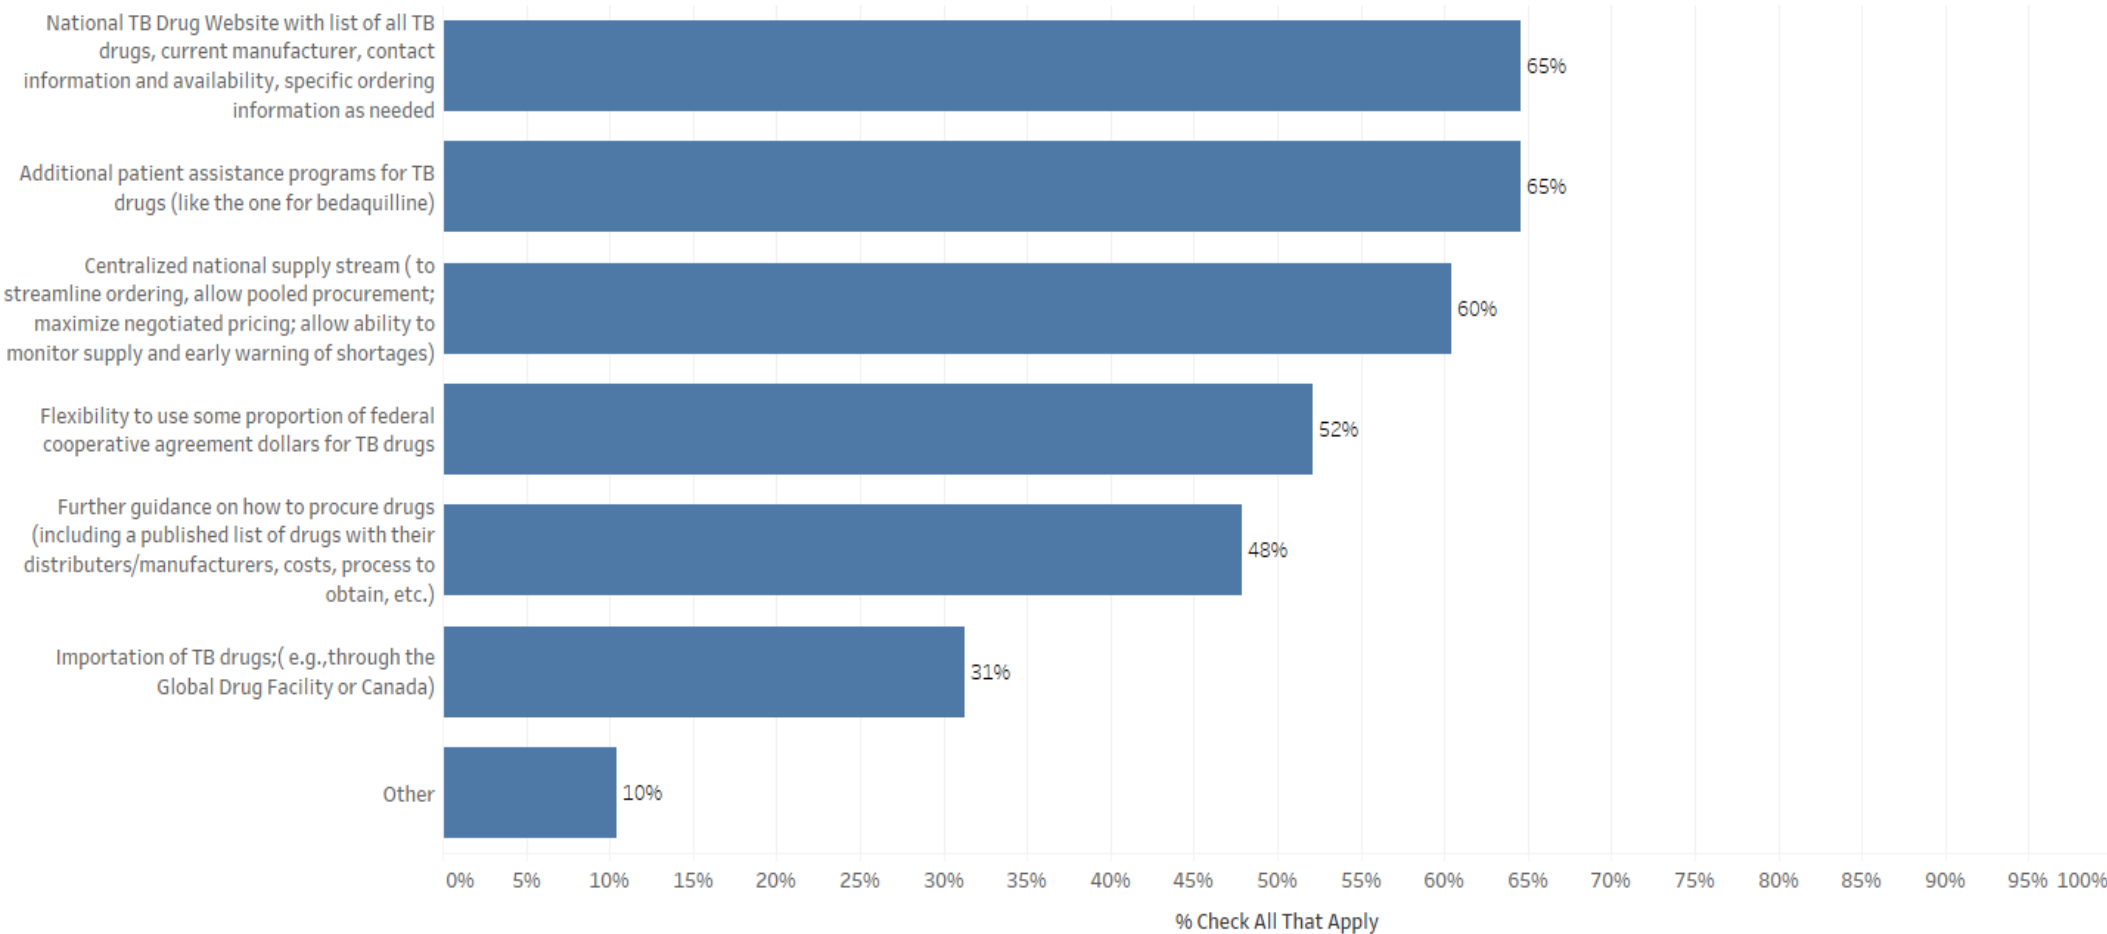

*Challenges in access or affordability of TB drugs resulted in higher costs to programs in personnel time and cost of the drug.*

# Please check the potential solutions needed to improve access to TB drugs.

*\*Among those that responded that their jurisdiction faced challenges in accessing/affording TB drugs.*

If no challenges with access or affordability of TB drugs in 2019, do you think any of the following solutions are needed to improve access to TB drugs?

Other - Write In: Please check the potential solutions needed to improve access to TB drugs (check all that apply)

*Suggestions for other potential solutions to improve access to TB drugs focused on use of 340B, increased funding/funding flexibility for TB programs and improved planning for and communication about potential shortages*
